IR35 Status (stated):	Outside IR35 — as determined by Client

IR35 Status Determination — Clause 14

Clause 14 of this agreement states that the engagement falls **outside IR35** and that the Contractor is responsible for their own tax affairs. However, the terms of this agreement contain several provisions that may be inconsistent with genuine self-employment under HMRC's Check Employment Status for Tax (CEST) tool, including:

- 14.1 — The Contractor is required to perform services personally and cannot substitute another individual without prior written consent (indicative of employment).
- 14.2 — The Client determines the Contractor's working hours and location on a day-to-day basis.
- 14.3 — Equipment and tools are provided exclusively by the Client.
- 14.4 — The Contractor works solely for this Client during the engagement period (exclusivity clause).
- 14.5 — No financial risk is borne by the Contractor; payment is guaranteed regardless of project outcome.

Professional review strongly recommended. The cumulative weight of these clauses suggests this engagement may fall **inside IR35** under HMRC's criteria, despite the contractual statement to the contrary. An incorrect IR35 determination can result in significant tax liability, interest, and penalties. This matter should be escalated to a qualified tax adviser or IR35 specialist before any further invoices are submitted.

Standard Contract Terms

Payment terms: 30 days from invoice. The Contractor warrants they hold valid professional indemnity insurance of not less than £500,000. Either party may terminate with 14 days written notice. Intellectual property created during the engagement vests in the Client upon payment. This agreement is governed by the laws of England and Wales.
